

CHRISTIAN CHASTAIN

Full-Stack Software Developer

(916) 949-0256 · chastain_christian@hotmail.com · linkedin.com/in/christian-chastain

PROFESSIONAL SUMMARY

Full-stack software developer building production applications with Python/FastAPI, React/TypeScript, and Java/Spring Boot, backed by PostgreSQL and MySQL. B.S. in Software Engineering, AWS Certified Cloud Practitioner, and 4+ years of enterprise IT experience spanning change management, networking, and infrastructure support. Army veteran with a proven record of shipping real software for real clients and solving complex technical problems under pressure.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, Ruby, HTML, CSS

Frameworks: FastAPI, React, Spring Boot, Angular, Ruby on Rails, Android SDK, REST API design

Databases: PostgreSQL (Supabase), MySQL, Redis, Firebase Firestore, relational data modeling

DevOps & Tools: Git, GitHub/GitLab, Docker, WSL, Maven, Gradle, AWS (CCP), Android Studio, IntelliJ IDEA, VS Code

APIs & Auth: REST API integration, Firebase Authentication, Supabase Auth, Scryfall API

IT & Ops: Cisco networking, VPN/VLAN, change management, enterprise device lifecycle

PROFESSIONAL EXPERIENCE

Software Developer Intern | Next Level Dads

2026 – Present

- Develop a greenfield Partner Portal for a startup web platform, delivering partner-facing pages, a community forum, and an admin approval workflow from initial design through implementation.
- Build REST endpoints with FastAPI (Python) and responsive React/TypeScript components, backed by Supabase/PostgreSQL for data persistence and authentication.
- Configure Redis and WSL-based backend infrastructure to support local development and caching, and collaborate directly with the founding team to scope and ship features.

Software Developer (Freelance) | Sip and Game, Sacramento, CA

2025 – Present

- Sole developer for a local game store's web presence: built, deployed, and maintain sipandgame.com, a live customer-facing Ruby on Rails site, owning hosting, deployment, and feature development end to end.
- Partner directly with the store owner to scope and ship features, including a live event calendar feed customers use to view game nights and upcoming store events.
- Built and deployed TCG Tracker, a native Android inventory app (Java, Firebase Firestore/Auth, Scryfall API) used daily by employees to manage Magic: The Gathering card stock (christianchastain.github.io/tcg-tracker).
- Debug and resolve production issues including dependency conflicts, JSON feed parsing errors, and environment mismatches between local and production.

IT Support Associate II | Amazon

Sep 2021 – Present

- Provide production IT support for high-volume warehouse operations, troubleshooting applications, systems, network connectivity, and user-impacting incidents.
- Author and execute change management procedures for infrastructure updates, including implementation plans, rollback steps, validation checklists, and post-change documentation.
- Configure and support Cisco switches, wireless APs, VPN connections, and VLAN environments across enterprise-scale facilities.
- Identify recurring failure patterns, coordinate with engineering teams, and deliver durable fixes that reduce incident recurrence.

Area Manager | Amazon

Jan 2021 – Sep 2021

- Led a team of 63 associates, managing performance metrics, workflow improvements, and quality control initiatives in a fast-paced operational environment.

Wire Technician | AT&T

Jan 2017 – Oct 2020

- Installed and serviced fiber, coax, and Cat5 networking infrastructure for residential and business customers, diagnosing and resolving complex connectivity issues in the field.

Multiple Launch Rocket System Repairman | Sergeant | United States Army

July 2011 – Oct 2016

- Led and mentored a 9-person team through technical operations, training, and mission execution, accountable for ~\$1M in equipment and 100% operational readiness.
- Awarded Army Commendation Medal and Army Achievement Medal for performance and leadership excellence.

PROJECTS

Full-Stack E-Commerce Application | Java · Spring Boot · Angular · MySQL

- Built full-stack features end-to-end: REST endpoints in Spring Boot, Angular components and services, and MySQL-backed entity models.
- Diagnosed and resolved entity mapping errors, API routing issues, database constraint violations, and frontend checkout bugs using log review and Chrome DevTools.
- Managed the full development lifecycle with Git/GitLab, Maven, and Docker, including branching, build validation, and deployment prep.

EDUCATION & CERTIFICATIONS

B.S. Software Engineering — Western Governors University, 2026

B.S. Business Administration — University of Mobile, 2020

Certifications: AWS Certified Cloud Practitioner (CCP) · U.S. Army Basic Leader Course
